ASELSAN and SAPURA Signed MoA to Establish Partnership in the Field of Software Defined Radios

December 30, 2019

ASELSAN has signed memorandum of agreement (MoA) with Sapura Secured Technologies (SAPURA), a leading defence electronics company in Malaysia, with regards to the transfer of technology of Software Defined Radios (SDR) in conjunction with KL Summit 2019 held in Kuala Lumpur, Malaysia between December 18-21, under the auspices of President Recep Tayyip Erdoğan and Malaysian Prime Minister Tun Dr. Mahathir Bin Mohamad.

As a company, ASELSAN plays constructive role in order to meet the requirements of the end users in various nations while contributing to their technological

acquisition ambitions and policies. In line with this perspective, the agreement signed with SAPURA is a crucial step regarding the transfer of technology of SDR to friendly and allied nations.

In accordance with Malaysia's long-term needs and the long-standing relations between both countries, SAPURA, through this agreement aims to continue to enhance in-country capability to design and develop defence technologies, specifically in military communications.

In the press statement, ASELSAN said that it will continue to seek for the opportunities of developing local cooperation and strategic alliance in Malaysia on its wide range of engineering and defence solutions.
